**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 18 to 22 and 24 to 26, drawn to a process for the bacterial oxidation of sulphide ores.

Group II, claim(s) 27 to 30, drawn to a bacterial culture.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 18 is obvious in view of the patent to Kohr et al (US 6,110,253) which discloses a bioleaching process for extracting copper from chalcopyrite bearing ore wherein the culture comprises a mixed culture that biooxidize sulfide minerals at a temperature above 60°C the ore includes chalcopyrite having a particle size less than about 250 µm (cols 28 and 29 Claims 9 and 10) which suggests the claimed process accordingly the special technical features linking the two groups does not provide a contribution over the prior art and no single inventive concept exists..

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1742

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
